Registration

To register, click on the “Don’t have an account? Register here!” Button located on the Login-Page. Then fill out the registration Form and press “Register”. If successful, you will automatically return to the Login-Page

Login

To login, simply type in your Username and Password and press “Login”. If your Credentials are incorrect, a message will show.

Library

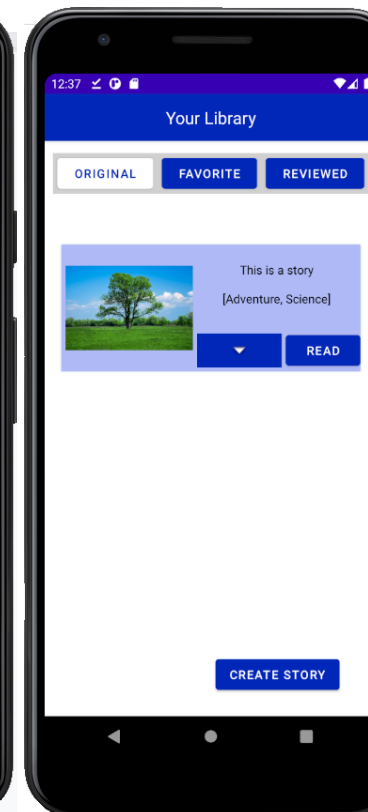

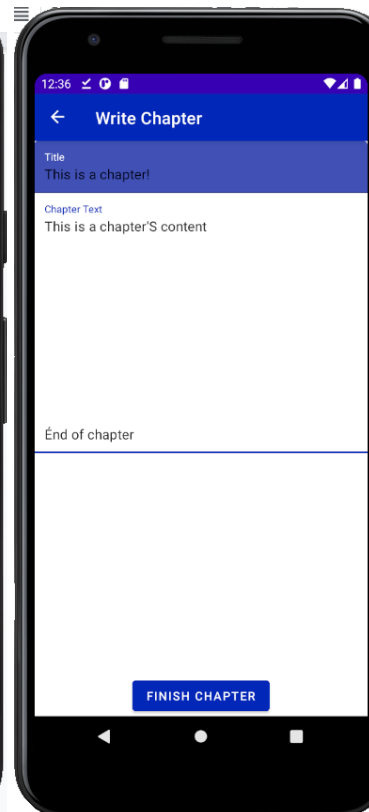

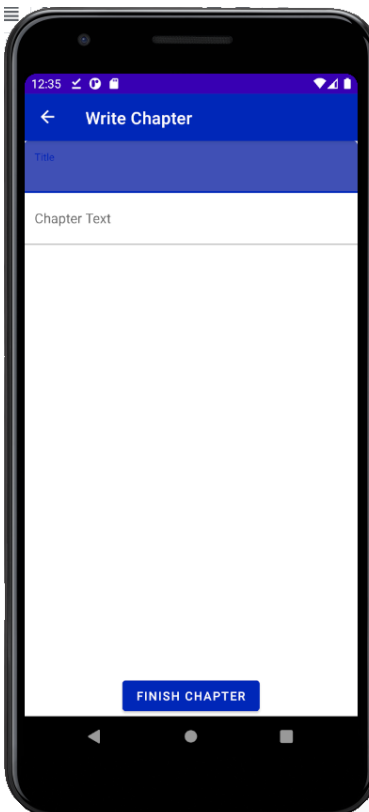

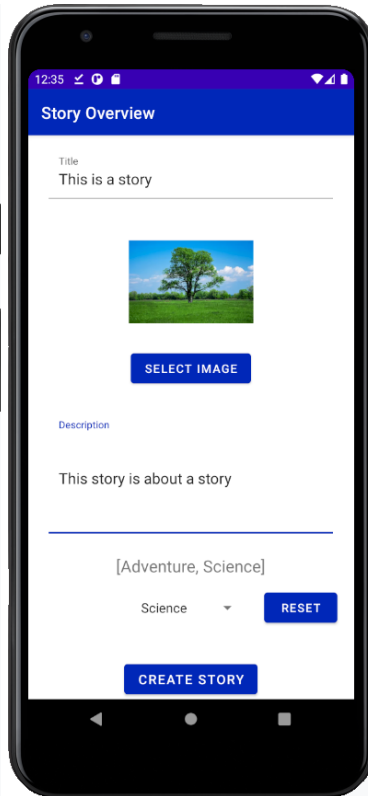

To navigate to your Library, swipe from the left to open the Navigation-Drawer. Then press “Library”. Your Library contains your Original Stories, those you favorited and those you reviewed. You can switch between filters by pressing the corresponding Button. If you double-press a button so none of the filters are active, all 3 Categories show at once.

Create a Story

To create a story, press the “Create Story” button in the library. Now fill out the form. Story-Tags can be added by selecting them in the drop-down. To remove them, just click the “Reset” button. After you create the story, a window will open where you can write the first chapter. Fill out the form and press “Finish Chapter”.

You will now find yourself back in your Library and the story has been created. You can add more chapters later by opening a story and pressing the “add Chapter” button.

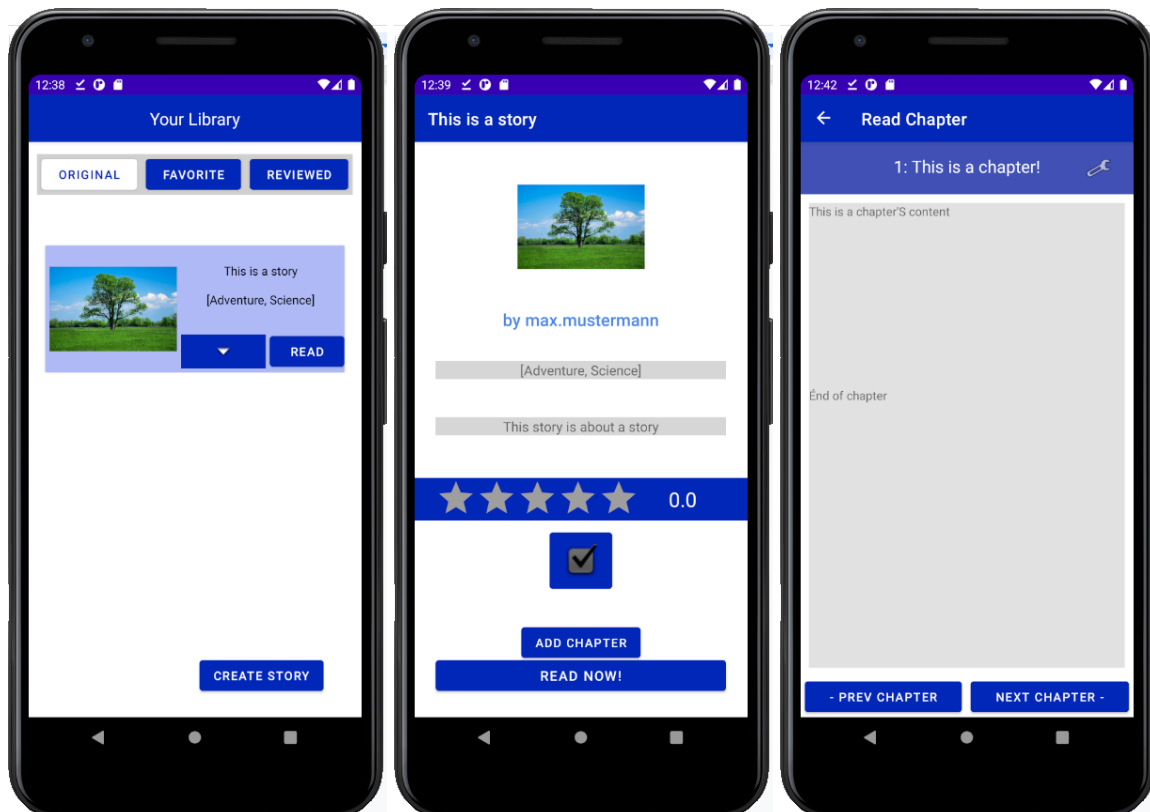

Read Stories

To read stories, simply find some either in your library or in the story finder. Then just press the “Read” button to open one. In this overview, we see all the relevant details of the story. In this case, since this is our own story we have the option to “add Chapter”s.

If you press the tick box, you will favorite this story. Favoriting a story is a way to show stories you like in your library (where only original, favorited and reviewed stories appear). A favorited story will have a green tick box.

If you click “Read Now!” it will start the E-Reader. To navigate between chapters, click on the “prev” and “next” Buttons. To close the Reader, either click on the button in the top-left or press your phones “back”-Button.

Story Search

To search for a story, open the navigation-Drawer and press the “Story Finder”. There you can either search by Name or by Tag or by both
